

Validation of Changes to Microchip Details in FEI Registered Horses

This form must be completed by a veterinarian and sent to the NF under which the Horse is registered. The NF shall then provide this form to the FEI in order for necessary changes to be made to the FEI Database.

Horse name: _____ FEI ID/
Passport Number: _____

Microchip number as
currently stated in passport: _____

I _____ (*veterinarian*) declare that I have examined the horse described above on _____ (*DD/MM/YYYY*). I have verified the horse's identity against the horse's FEI Passport/National Passport/FEI Recognition Card (*delete the non-relevant*). The horse's microchip has been scanned and the microchip: (*tick as applicable*)

is no longer functioning. I confirm that I have implanted a new microchip which can be read using a universal microchip reader. The functioning microchip number in this horse is _____ and the number has been entered in the passport in the 'Other' Box on the Description page.

does not match the microchip number originally recorded in the horse's passport. The microchip number identified on scanning the horse is _____ and this number has been recorded in the horse's passport in the 'Other' box on the Description page.

Other (*please state reason and action taken*): _____

I understand that it is my obligation to inform the National Federation under which the horse is currently registered, in addition to any other passport issuing organisation*, of any changes relating to the identification of the horse. I further understand that failure to inform the National Federation of the above sanctions can be imposed on me in accordance with the FEI Veterinary Regulations.

Name of
Veterinarian: _____

Signature _____ Date: _____

Location (*Town and Country/NF*): _____

*Other passport issuing organisations include national passport issuing bodies approved by the FEI.
